Duisburg, den 02.05.2019

Dear Mr. Allenstein,

Reederei Jaegers GmbH had evaluated "THERMOL-D", manufactured by Abhitech Energycon Ltd., in two of our ships extensively during 2014 and 2015.

During these extensive trials, we had also carried out endoscopy observations of the Engine Piston and Liners etc. During these observations, we found overall engine cleanness. We did not find any additional wear & tear due to usage of "THERMOL-D".

After this extensive evaluation, we have been using "THERMOL-D" in our Barges / Inland Vessels operating in Germany and other European countries since last about 4 years.

Our vessels are fitted with Caterpillar, Mitsubishi, Cummins, Volvo and MTU engines. We have observed following benefits with the usage of "THERMOL-D":

1. Reduction in fuel consumption.
2. Reduction in Carbon Deposits on injectors and Cylinder Liners and Piston Top.
3. No adverse effect on engine metallurgy or fuel system components.
3. Reduction in emissions.
4. Reduction in Engine noise level.
5. Reduction in overall operative costs.

We are very satisfied with usage of THERMOL-D, which has helped us in reducing the fuel consumption and the overall operating costs.

Mit freundlichen Grüßen

Klaus Valentin
