TO WHOSOEVER IT MAY CONCERN

We have extensively evaluated Thermol-D, a multi-functional combustion catalyst since 2016 continuously in our equipment at our Sonadih Cement Plant of M/s Nuvoco Vistas Corporation Limited. (Thermol-D is manufactured by M/s Abhitech Energycon Limited and marketed by M/s MK Diesels.)

We have observed a consistent diesel saving of 4-5% on the usage of Thermol-D. Also during our periodic tests of equipments, no adverse effect on any engine component was found on account of Thermol D usage.
